## (54) ELEMENT, APPARATUS, AND METHOD FOR DETECTING GASEOUS OZONE

## (57)Abstract:

PROBLEM TO BE SOLVED: To provide an element, an apparatus, and a method for detecting gaseous ozone capable of easily and accurately detecting gaseous ozone and being cumulatively used and having no problems of interference or inhibition by other gases.

SOLUTION: Both a transparent porous body and pigment which acts with ozone and changes its absorbance in the visible region in the pores of the transparent porous body are provided.

## LEGAL STATUS

[Date of request for examination]

01.03.2004

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]
